

**PATIENT APPLICATION FORM:  
CHILD**

WELCOME and THANK YOU for trusting us with your child/children applying as patient(s) in our clinic. We are a very unique team specializing in researched, evidence-based, spinal pediatric adjusting and postural rehabilitation that has helped infants, young children, and even teenagers with early onset to advanced spinal distortion and injuries known to cause developmental and lifelong health problems. We may not accept your child as a patient until we are absolutely certain we know what's causing their condition, perform the necessary tests to determine the optimal program of correction, and we are completely confident you and your child place their health as a TOP PRIORITY. At that time we will make specific recommendations. Thank you again for giving your child the opportunity to apply as a patient.

## Health Conditions

Your spine is the foundation of health and core strength in your body. Shifts in the vertebrae or sections of the spine will spread ultimately causing weakness and distortion to ALL the areas of the spine. These distortions are reflected in abnormal posture. Research shows abnormal posture leads to chronic pain, disease and possibly a shortened life span.<sup>1</sup> Please answer the following questions accurately so we may determine the full extent of your child's condition.

### HISTORY OF TRAUMA

The below-listed traumas may lead to misalignment of the individual vertebrae, soft tissue injury to the supportive structures of the spine, as well as shifts and distortions in whole curves and sections of the spine. Please check any of the following if your child has experienced such (*if you check an item with an asterisk, please offer a detailed explanation*):

- Fell from a height of two (2) feet or more as an infant
- Experienced a fall that left a bruise or lump on their head or other resulting trauma\*
- Rough shaking as an infant
- Were involved in a car accident (*if you check this item, please ask the front desk person for the corresponding form*)
- Experience broken bones or debilitating injuries\*
- Difficult Birth (see below)
